

Accuracy certificate of PAPOUCH sensors

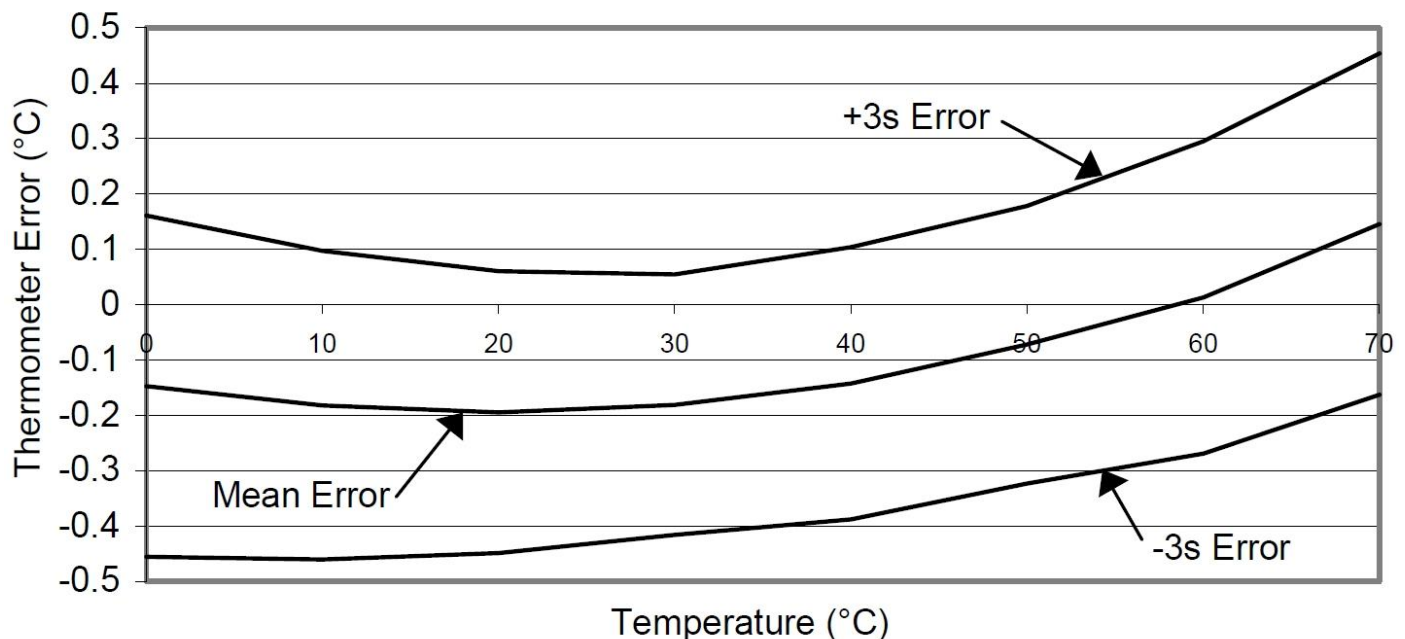

All of products below equipped by DS18B20 sensor from Maxim Integrated Products, Inc. (formerly Dallas Semiconductor) measures temperature with following accuracy:

Temperature range	Accuracy	Units	Notes
-10°C to +85°C :	± 0,5	°C	1.)
-55°C to -10°C and 85°C to 125°C	± 2,0	°C	Typically

Notes:

- 1.) See graph 1. "Typical error curve"

DS18B20 Typical Error Curve

Graph 1.

Products based on DS18B20 sensor:

TM, TMU, TME, TME_PoE*, TH2E*, TQS3**, THT*, Quido**, PAPAGO**

* More precisely SNS_TEMP Xm, if it is connected to TH2E unit.

** All probes for products from this product line.
